Watonwan County Retail Trade Overview

Total Taxable and Gross Retail Sales

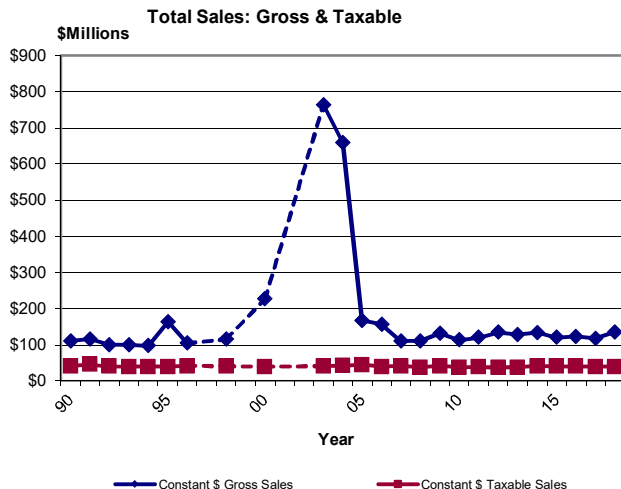

The table below presents gross and taxable retail and services sales for St. James from 2003 through 2018. Taxable sales in St. James increased 0.2 percent from 2011 to 2018, while the number of firms fell 2.9 percent. Statewide, taxable sales increased 9.4 percent over the same time period and the number of firms fell 3.4 percent. The per capita sales and pull factor data in this table are based on taxable sales, the more verified sales measure.

The table also presents sales data in constant 2018 dollars. These figures have been adjusted for inflation to reflect their value in 2018. For example, in 2008, taxable sales in St. James totaled \$33.08 million, an amount worth \$37.59 million in 2018 dollars. In constant dollars, gross sales grew 12.2 percent between 2011 and 2018. Constant dollar taxable sales increased 2.5 percent over the same time period.

Year	Estimated Population	Current Dollars		Constant 2017 Dollars		Number of Firms	Per Capita Sales	Pull Factor
		Gross Sales* (\$millions)	Taxable Sales (\$millions)	Gross Sales* (\$millions)	Taxable Sales (\$millions)

Trade Area Analysis of Retail Sales

Watsonwan County

The following tables provide information on retail sales by merchandise category. "Potential sales" is a standard to which actual performance is compared. In calculating potential sales, population and income characteristics are taken into account. Potential sales can be used as a guideline or "par value" in analyzing retail strength.

Deviations from these norms can be analyzed to first judge whether they should be considered relevant. If the differences appear to be significant (whether in dollar amounts or relatively with percentages), additional consideration is merited. Categories with undesirable performance may be further examined for potential corrective action. It is also important to determine whether or not the situation is relatively uncontrollable due to external or extenuating circumstances. In cases of favorable differences from expectations, the positive aspects should be identified and built upon.

Trade Area Analysis by Merchandise Category, 2018

Merchandise Group	Potential Sales (\$millions)	Actual Sales (\$millions)	Variance Between Actual & Potential		Trade Area Pop. Gain or Loss	Number of Firms	Percent of Total Sales

Watonwan County Retail Trade Performance in Percentages

The chart below depicts the percentage amount Watonwan County's actual sales were above or below potential sales in 2018 by merchandise group. Of the 11 merchandise categories with reported data, sales in 2 of the categories were above what would be expected based on the county's population and income characteristics as well as statewide spending patterns. The strongest merchandise group by this standard is the Gasoline Stations category, which has a 140.1 percent surplus. Overall, Watonwan County had a retail sales leakage of 51 percent.

It is important to note that variations in a county's relative retail performance may occur for a variety of reasons, some of which are beyond the control of local policy. Proximity to larger population centers and transportation patterns, as well as the individual retailer's management and marketing, can cause the retail sales of a particular county to deviate substantially from potential sales. It is important that decision-makers consider these influences when constructing policies, plans, or projects.

Percentage Above or Below Potential Sales, 2018

Watonwan County Retail Trade Performance in Dollars

The chart below depicts the dollar amount Watonwan County's actual sales were above or below potential sales in 2018 by merchandise group. Of the 11 merchandise categories with reported data, sales in 2 of the categories were above the calculated potential. The strongest merchandise group by this standard is the Repair, Maintenance category, which has a \$2.9 million surplus. Overall, Watonwan County had a retail sales leakage of \$40.2 million in 2018.

It is important to note that variations in a county's relative retail performance may occur for a variety of reasons, some of which are beyond the control of local policy. Proximity to larger population centers, management, marketing, and transportation patterns are just a few factors that can cause the retail sales of a particular county to deviate substantially from potential sales. It is important that decision-makers consider these influences when constructing policies, plans, or projects.

Compare the Community to the Region

St. James and Watonwan County

On other pages of this report we compared communities using a combination of retail sectors and service sectors. The information on this page only includes businesses in **retail trade** and does not include service sectors. The retail trade sectors include the following: building materials, motor vehicles & parts, clothing, food stores, electronics, convenience stores, leisure goods, health stores, furniture, general merchandise, non-store retail, and miscellaneous stores.

2018 Retail Sales per capita

State of Minnesota Per Capita Taxable Retail Sales & Threshold Levels for Selected Goods and Services 2018

Threshold level refers to the number of people per business, which can be used as a general guide for determining the "critical mass" necessary to support a business. These are broad averages for the state as a whole and do not reflect differences in income, tourism, agglomeration, establishment, etc. Further, the business counts are based on the number of sales tax returns filed and are converted to "full-time equivalents." Multiplying people per business by sales per capita yields average sales per firm. In addition to state averages, averages for the non-metropolitan regions were calculated by excluding the seven county Minneapolis-St. Paul metropolitan region.

Business Activity / Store Type NAICS	People Per Business		Sales Per Capita
